

Gisselle Francisco

Computer Science Student | Frontend Development & UX/UI

I am a senior studying Computer Science at California State University, Northridge, with an expected graduation date of May 2027. My project experience includes responsive websites, frontend development, and user interface design. I enjoy collaborating with teams to build useful, accessible web experiences.

Project Experience

RoamReady | Senior Project

Cal State Northridge | Northridge, CA

August 2026 - Present

- Collaborating with a team to develop a responsive travel planning web app for itineraries, budgeting, packing, and destination research
- Designing authentication, itinerary, and checklist wireframes and a visual design system in Figma.
- Using Jira to track user stories and sprint tasks as part of the teams Scrum process.
- Contributing to frontend planning and development with Next.js and Tailwind CSS.

SoundProof | Human-Computer Interaction Project

Cal State Northridge | Northridge, CA

August 2026 - Present

- Collaborated with two teammates to propose a social media app for rating, reviewing, and discovering songs and albums.
- Designed a "rate before reveal" feature that hides friends' rating until users submit their own.
- Defined the apps core screens and user flows for search, reviews, friend activity, and profiles; developing initial UX models to guide the design.

Yellow Mango | CodePath Introduction to Web Development

Remote

June 2026 - August 2026

- Built a responsive cooking event website featuring recipe cards, cooking times, event information, and an RSVP section using HTML and CSS.
- Implemented a light/dark mode toggle, RSVP form validation, participant count updates, and a configuration modal using JavaScript and DOM manipulation.
- Completed CodePath's Intro to Web Development course with honors.

Work Experience

FOH Cashier/Expo

August 2026 - Present

- Operated register, processed payments, and resolved customer inquiries and complaints to maintain high guest satisfaction

- Expedited orders and assisted back-of-house during peak hours to keep ticket times on pace

Retail Associate

July 2025 - May 2026

Culver City, CA

- Provided friendly and attentive customer service by assisting customers with questions, purchases, and product needs.
- Worked collaboratively with team members to complete daily tasks and maintain efficient store operations.
- Supported daily store operations while maintaining an organized and welcoming shopping environment.

Education

California State University, Northridge, 2023 - Present

Bachelor of Science, Computer Science

Anticipated Graduation 2027

Through projects such as RoamReady and Yellow Mango, I am gaining experience building responsive websites, designing user interfaces in Figma, and collaborating with teams.

CodePath, June 2026 - August 2026

Intro to Web Development | Completed with Honors

Built Yellow Mango, a responsive one page cooking event website using HTML, CSS, and JavaScript. Features included a light/dark mode toggle, RSVP form validtion, participant count update, and a confirmation modal.
